NCU is a campus of tranquility with numerous pine trees scattering over the place. On the one hand, the green campus provides a platform for self-learning and the realization of their outstanding research performance. In addition to constantly making efforts on the research and development of four research fields and two specialized fields, achieving outstanding performances in their professions, students should be able to think reflexively, lead our faculty and students to create a learning environment with both strong humanistic concerns and a comprehensive university of rich scientific and humanistic facilities.

With the grants from “The Aim for the Top University Project,” NCU focuses on the development of four research fields and two specialized fields, achieving outstanding research performance. In addition to constantly making efforts on the research and development of four research fields and two specialized fields, achieving outstanding performances in their professions, students should be able to think reflexively, lead our faculty and students to create a learning environment with both strong humanistic concerns and a comprehensive university of rich scientific and humanistic facilities.
